

TABLE SHOWING THE IMPACTS ON BUSH FOREVER SITES IN THE PROPOSED 'Perth and Peel Green Growth Plan for 3.5M (Dec 2015)							
KEY TO ACTIONS/ COMMITMENTS							
BFA = Bush Forever Area							
Existing Conservation Reserve							
Phase1 Conservation Commitments							
Phase 2 Conservation Commitments. [Note these are often underlain by other Actions - particularly infrastructure, see BFA 48- Kensington Bushland as example]							
Specific Commitments : No clear assurance that 100% of BFA area will be retained as bush (no direct impact) where this coincides with Urban/Industrial Actions/ Rural Res/ BRM Actions. Also many such areas lack good buffers around them.							
If Specific Commitments are really UNEQUIVOCAL commitments to protect 100% of these BFA, rather than fragmenting bush further into smaller areas of protected MNES etc why are these areas not changed to Phase 1 Conservation Commitments?							
Broad Commitments: No assurance as to exactly what % of BFA will be retained (is it just 10% Open Space as usual for Urban/ Industrial/ Rural Res)							
This set of commitments also appears to be backing away from the current public, appealable process of approvals, into an "internal process" (quote from Action Plan ?H).							
Exemptions from Mining Leases: The conditions of this exemption and how it will assure the protection of 100% of the BFA involved from direct AND indirect effects of mining adjacent are not given.							
Basic Raw Materials (BRM) mining leases (current or proposed) are not shown on GGP map viewer or other GGP maps at required scale. They are also very difficult to see Dept M & P map viewer at required scale (due to large amounts of crowded data) & GGP boundaries of BFAs & other conservation areas not shown.							
Importantly Underground Water Pollution Control Areas are NOT shown on GGP or DPM viewers or other GGP maps.							
Urban Development							
Industrial							
Rural Residential							
The "No Urban /Industrial/ Rural Residential/BRM Layer" on the GGP map viewer often covers major Infrastructure, & perhaps some BRM leases or other potential impact. BFA 53 Clifford Rd Maddington Bushland illustrates this.
